

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## UBS (Lux) Medium Term Bond Fund - EUR, class Q-acc (ISIN: LU0358446192), EUR

a sub-fund of UBS (Lux) Medium Term Bond Fund

This sub-fund is managed by UBS Fund Management (Luxembourg) S.A., a part of UBS AG.

## Objectives and investment policy

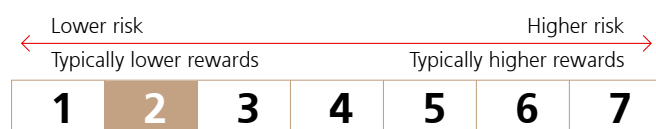

The investment fund invests mainly in EUR-denominated government and corporate bonds with medium-term maturities (up to 5 years) from issuers with high credit ratings (classified as "Investment Grade" by the established rating agencies).

The fund manager combines various carefully selected issuers and securities with different terms with the objective of exploiting interesting earnings opportunities and in doing so keeping the level of risk under control.

In principle investors may ask the management company to redeem their units on any normal bank business day in Luxembourg.

Income of this share class is reinvested.

## Risk and reward profile

### More about the risk category

- The risk category is based on the estimated future volatility of the fund. The method used for this estimate depends on the fund type and historical data.
- Historical performance is not a reliable indicator for future performance.
- The risk category allocated is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this fund is free of risk.

### Why is the fund in this category?

- The fund has been allocated to risk category 2 because the variation in performance is very low.

### Further material risks

- Credit risk: Failure by an issuer of securities or a counterparty in transactions with derivatives to make payment has a negative impact on the valuation of the related investment in the sub-fund.
- The value of a share may fall below the purchase price, thereby affecting your capital.
- Operational risk/third parties: The administrative tasks for the fund have been delegated to third parties. If these are affected by an event, this could have a negative impact on the sub-fund and even cause a financial loss.

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	6.00%
Exit charge	2.00%
Conversion fee	3.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.56%
Charges taken from the fund under certain specific conditions	
Performance fee	none

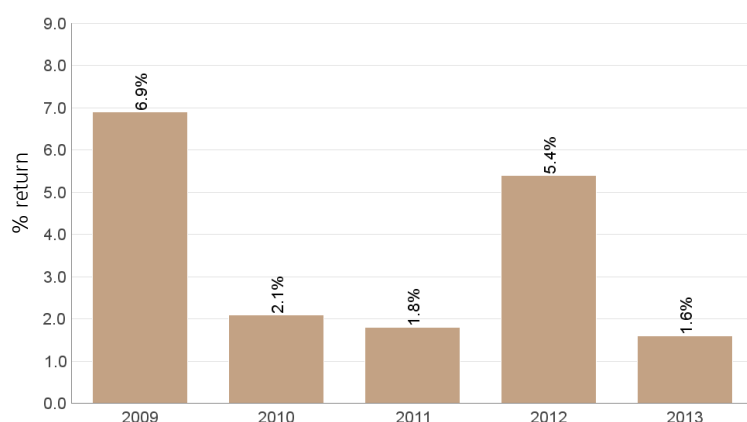

The **entry charge** and **exit charge** shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** figure is based on the last twelve months prior to the preparation of this document. This figure may vary from year to year. It generally excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at [www.ubs.com/funds](http://www.ubs.com/funds).

## Past performance

### Historical performance is not a reliable indicator of future results.

The chart shows the class's investment returns calculated as a percentage change in the fund's net asset value from the end of one year to the end of the next. In general, the calculation of past performance takes account of all costs but not the issuing commission. If the fund is managed against a benchmark, its return is also shown.

The class was launched in 2008. The fund was launched in 1995

The past performance is calculated in EUR.
